NETWORK2WORK

Executive Summary

In the larger Charlottesville region, 22,467 families (32%) do not make enough money to meet their basic needs, including the cost of housing, child care, food, transportation, health care, phone, internet, and taxes. Rising costs and inflation combined with stagnant wages and undervalued labor has made it increasingly difficult for families to be self-sufficient.

The goal of the Orange Dot Report is to provide an overview of the families in our region who struggle to afford the basic necessities. To determine what annual income is required for a family in our region to be considered self-sufficient, this year's report uses household budget data from the national research project, United for ALICE. United for ALICE provides household survival budgets that reflect the minimum cost of living in today's economy and vary by location and family size.

The Orange Dot Report focuses on families living in the City of Charlottesville and the surrounding counties of Albemarle, Buckingham, Fluvanna, Greene, Louisa, and Nelson. The average annual survival budget for families in our region ranges from around $66,000 in Buckingham to $87,000 in the City of Charlottesville. A detailed breakdown of these costs and wages is provided in this report for each locality.

While families facing economic insecurity live throughout our region, the struggle is not equally shared. For families with children under 18 years old, the financial burden is larger: 1 in 3 (34%) do not earn enough to meet their basic needs, compared to 1 in 5 (20%) families without children under the age of 18. Additionally, 56% of Black families and 47% of Hispanic families do not earn enough to meet their basic needs, compared to 28% of white families.

The percent of families struggling overall is highest in Buckingham and Greene counties at 41%, and lowest in Albemarle County, at 27%. The variation within localities is even greater. Most localities in our region have areas where over half (50%) of families have less than family-sufficient incomes. Albemarle, Fluvanna, and the City of Charlottesville each have neighborhoods where 3 in 4 families (75%) do not earn enough to meet the local cost of living.

In addition to presenting survival budgets and income data for families, the Locality Profiles in this year's Orange Dot Report also include information on households aged 65 years and over. There are many areas in our region where those 65 years and over, who may no longer be in the workforce and living on fixed incomes, do not have enough to meet their basic needs.

Despite more than a decade of attention and the dedicated efforts of many valuable organizations and programs, there are still too many struggling families. For a region as prosperous as ours, we have the means to build programs and enact policy that help more families become self-sufficient. Our hope is that by shining a light on these families, we can help inform the efforts to end these struggles.

Introduction

> We seek to build "a world of constantly accelerating economic progress—not material welfare as an end in itself, but as a means to liberate the capacity of every human being to pursue his talents and to pursue his hopes."
>
> — Robert F. Kennedy, Remarks delivered June 6, 1966, Cape Town, South Africa

A community thrives when its residents thrive. Residents thrive when their capacity as human beings is unleashed. And their capacity as human beings can only be unleashed when their basic needs are met.

As illustrated in the pages that follow, there are too many families in our community who do not earn enough to meet their basic needs. When you worry every month about paying the landlord, every week about buying groceries, every day about whether your car will start, it is difficult to be the parent you want to be, the worker you know you could be, or the person you were meant to be.

There are thousands in our community who dream of being their better selves, but their daily reality causes that dream to fade. Too often, that reality involves working long hours for low wages. These neighbors have a lack of income, but not a lack of value. They want to do better for themselves and their families, but the pathway that could lead them there is unmarked. They recognize the potential they have within them but can't find the way to realize that potential.

In his "I Have A Dream" speech, Dr. Martin Luther King, Jr. lamented that there were too many Americans living "on a lonely island of poverty in the midst of a vast ocean of material prosperity."

Today, we remain surrounded by a vast ocean of material prosperity. Yet, here in our community there are too many families currently stranded on that island. Too many who do not make enough to meet the costs of survival—food, shelter, clothing and utilities—and the added costs related to working—childcare and transportation. Too many left behind.

> "Only when we know where we are will we know where we can go and how we can get there." — Robert F. Kennedy, in a 1968 address, paraphrasing from Abraham Lincoln's "House Divided" speech.

We cannot begin to realize the potential of those being left behind, however, without understanding their circumstances.

Defining Self-Sufficiency

The goal of the Orange Dot Report is to provide an overview of the families in our region that struggle to afford the basic necessities, to describe where we are. This year's report uses household budget data from the national research project, United for ALICE, to estimate the annual income required for a family in our region to be self-sufficient.

United for ALICE provides household budgets that are specific to location and household composition, taking into account different-sized households, ages of children and local cost of living. The Household Survival Budgets, used to determine family self-sufficiency in this report, reflect the minimum cost to live and work in today's economy and include housing, child care, food, transportation, health care, and technology, plus taxes and a contingency fund for one-time unanticipated costs. The data sources used by United for ALICE in determining household expenses are comparable to those used in past Orange Dot Reports, and their methods are replicable, updated annually, and sensitive to local context. For more information on the sources used in determining household budgets, see more at United for ALICE: https://www.unitedforalice.org/the-cost-of-basics/virginia.

The Orange Dot Report differs from the work of United for ALICE in one fundamental respect: Orange Dot focuses on family households while ALICE focuses on all households. Family households are defined by the U.S. Census as households where two or more people are related by birth, marriage, or adoption. By centering families, the Orange Dot Report focuses on households in our community who are more likely to be pooling resources and sharing in financial hardship.[1] To more clearly understand the impact of rising costs, this year's Orange Dot Report also provides data for both families with and without children under 18 years old. Families with dependents, in particular, face higher barriers to mobility, education, and other investments to improve work and wage prospects.

Families Struggling in Our Region

There are approximately 70,000 families living in the Charlottesville region, defined in this report as the City of Charlottesville and the surrounding counties of Albemarle, Buckingham, Fluvanna, Greene, Louisa, and Nelson. Of these families, over 22,000 (32%) do not earn enough to provide for their family's basic needs. This is nearly one in three families struggling to keep up with the rising cost of living in our region.

The summary tables below show the breakdown of struggling families in the Charlottesville

[1] Family households, by definition, exclude households composed of single adults. Thus, college students are not counted in this analysis unless they reside with a relative. As this definition can also exclude older adults living alone, who may face higher risk of economic instability, we include separate estimates of the economic self-sufficiency of households aged 65 and over to provide a more complete picture of this growing population.

region. In each locality, nearly 30% of families or more are struggling, with the highest percentages in Buckingham and Fluvanna, at 41%. Localities in our region vary in population, so that even though Albemarle has the lowest percent (27%), it has the highest number of families struggling to meet their basic minimum needs, at over 7,500.

While families facing economic insecurity live throughout our region, the struggle is not equally shared. For families with children under 18 years old, the financial burden is larger: 34% struggle to meet their basic needs compared to 20% for families without children under 18. Additionally, 56% of Black families and 47% of Hispanic families do not earn enough to meet their basic needs, compared to 28% of white families. This reflects a persistent gap resulting from past and ongoing policies that suppress investment, opportunity, and wealth creation in minoritized communities.

Table 1: Summary of Struggling Families in the Region

	Number of Struggling Families	Percent of Struggling Families
Albemarle County	7,552	27%
Buckingham County	1,656	41%
Charlottesville City	3,135	35%
Fluvanna County	2,585	34%
Greene County	2,338	41%
Louisa County	3,769	33%
Nelson County	1,433	37%
Total for Region	**22,467**	**32%**

Note: Values are approximate based on the U.S. Census Bureau, American Community Survey 5-year estimates (2020-2024)

Note: Total Estimate for Albemarle, Buckingham, Fluvanna, Greene, Louisa, Nelson Counties and the City of Charlottesville. Values are approximate based on the U.S. Census Bureau, American Community Survey 5-year estimates (2020-2024)

Figure 1: Percent and number of struggling families by race and ethinicity for the Charlottesville region, including Albemarle, Buckingham, Fluvanna, Greene, Louisa, Nelson Counties and the City of Charlottesville. 56% of Black families and 47% of Hispanic families do not earn enough to meet their basic needs, compared to 28% of white families.

Undervalued Labor

A majority (64%) of workers in struggling families are working at least 40 hours per week, the equivalent of a full-time job. Many of those who are working less than full time would like to work more. These workers are also in low-waged employment. Half of workers in struggling families are earning less than $30,000 a year—making it difficult to impossible to meet their household's survival budget for single or two-parent households. This deeper understanding about people in the workforce who are in families earning below what they need is drawn from the ACS Public Use Microdata Sample provided by the U.S. Census Bureau for our region.[2]

[2] The Thomas Jefferson Planning District includes the City of Charlottesville, and Albemarle, Fluvanna, Greene, Louisa, and Nelson counties. Buckingham County is not included in the microdata sample.

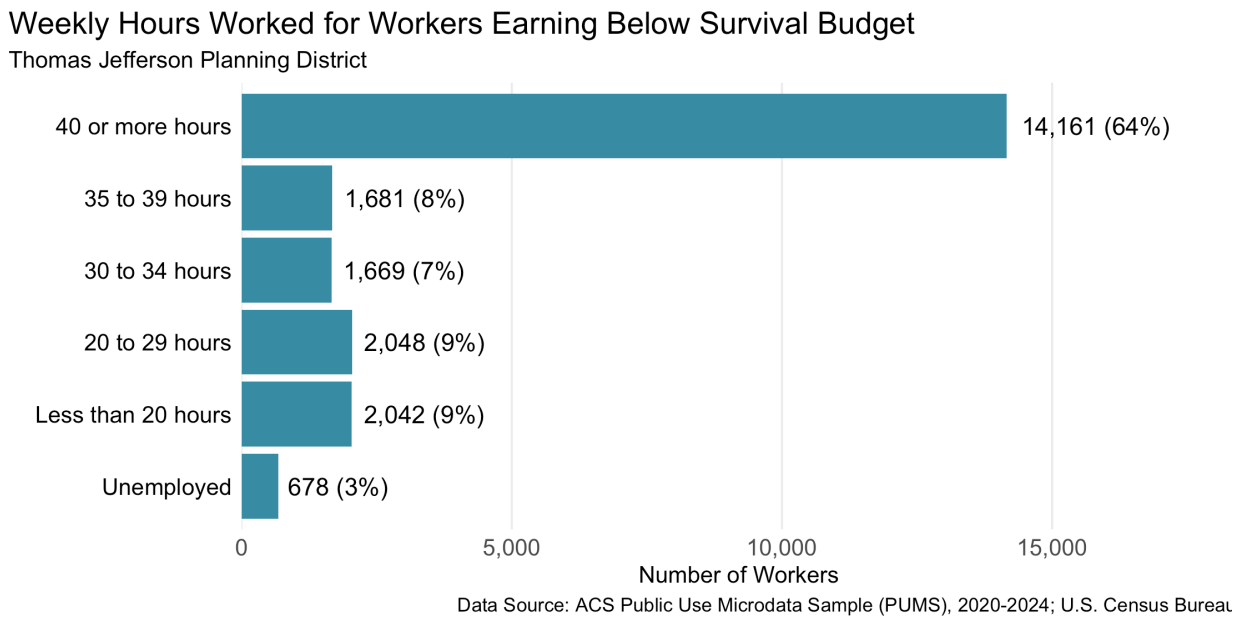

Figure 2: Estimated number and percent of workers in the TJ Planning District in families with income less than the household survival budget by weekly hours worked. 64% of these workers worked 40 or more hours a week; 88% worked 20 or more hours a week. The Thomas Jefferson Planning District includes the City of Charlottesville, and Albemarle, Fluvanna, Greene, Louisa, and Nelson counties. Buckingham County is not included in the microdata sample.

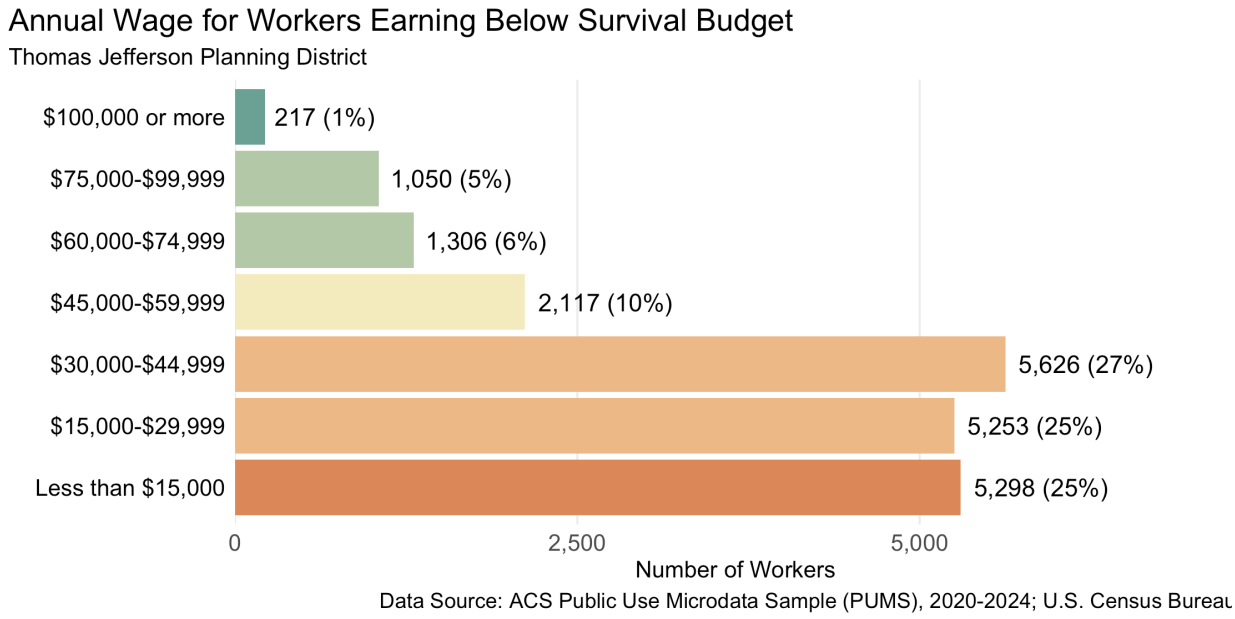

Figure 3: Estimated number and percent of workers in the TJ Planning District in families with income less than the household survival budget by their annual wage. 77% of these workers earned less than $45,000 a year. The Thomas Jefferson Planning District includes the City of Charlottesville, and Albemarle, Fluvanna, Greene, Louisa, and Nelson counties. Buckingham County is not included in the microdata sample.

As the data suggests, for most families, low-incomeness is not a constant that must be worked around, but a variable that must be changed. For a family experiencing economic struggle, the first question should be: What do they need to increase their income?

Some families are on fixed incomes or have otherwise reached a more constrained earning potential due to illness, caregiving responsibilities, and other circumstances. The vast majority of workers, however, have the capacity to earn a wage that can support their families. They are working, but their labor is not sufficiently valued.

The undervaluing of labor has far-reaching consequences. The myth of the American Dream promotes the idea that those who work hard and play by the rules will get ahead. The flipside of that myth—if you haven't gotten ahead, it must be because you don't work hard enough or play by the rules—leads to negative beliefs about the poor in our society and, subsequently, to reduced support for resources and programs meant to reduce the burdens of poverty. Working hard, however, does not guarantee that individuals will get ahead. Take the formulas below:

Hard Work × High Wages = High Income
Hard Work × Low Wages = Low Income

It's not the hard work that makes the difference—it's the low wage. The full-time worker making Virginia's minimum wage will have a gross income of $26,500 per year.[3] To reduce the number of struggling families, therefore, requires an increase in their wages. We need a system that identifies the hard-working families whose labor is not sufficiently valued and help them increase their value in the marketplace.

To get ahead, those workers need jobs and careers that pay enough to support their families. The table below provides information on the types of jobs and the corresponding wages that fall into different earning bands. Note that a number of the lowest-paying jobs provide some of the highest value for our society: caring for our children when they're young and our parents when they're old. These jobs require them to sacrifice for our benefit by working for less pay than they can live on.

Table 3: Selection of Occupations by Annual Median Wage Earned in the Charlottesville Metro Area[1]

Occupation	Annual Median Wage[2]	Employment Rate (per 1,000 jobs)[3]	Occupation Group[4]
Home Health and Personal Care Aides	$29,700.00	17.2	Healthcare Support
Fast Food and Counter Workers	$30,150.00	24.4	Food Preparation and Serving Related
Cashiers	$30,930.00	18.4	Sales and Related
Childcare Workers	$34,130.00	3.1	Personal Care and Service

[3] Based on the 2026 minimum wage of $12.77 per hour. In 2027, the Virginia minimum wage will increase to $13.75, and subsequently increase to $15.00 per in 2028.

General and Operations Managers	$107,200.00	22.1	Management
Dental Hygienists	$107,690.00	1.1	Healthcare Practitioners and Technical

[1]A full list of occupations and wages is available here: https://github.com/virginiaequitycenter/orange-dot/blob/main/OrangeDot7_2026/data/bls_occupations_by_wagebin.csv

[2]The annual median wage is the boundary between the highest and lowest paid workers in a given occupation. Half of the workers in a given occupation earn more than the median wage, and half the workers earn less than the median wage.

[3]Employment rate is the number of jobs (employment) in the given occupation per 1,000 jobs in the Charlottesville Metro Area

[4]Major occupation groups defined by the Standard Occupational Classification (SOC) system, used by Federal statistical agencies to classify workers and jobs into occupational categories for the purpose of collecting, calculating, analyzing, or disseminating data.

Data Source: U.S. Bureau of Labor Statistics, Occupational Employment and Wage Statistics; May 2025; https://www.bls.gov/oes/tables.htm

Locality Profiles

ALBEMARLE COUNTY

There are 28,396 families living in Albemarle County. Of these families, 7,552 (27%) do not earn enough to provide for their family's basic needs.

Albemarle County at a glance:

- The annual household survival budget for an average family in Albemarle County is $81,660. This is the approximate income working families need to meet their basic necessities. The household survival budget includes: housing, child care, food, transportation, health care, and technology (phone and internet), plus taxes and a 10% contingency fund for one-time unanticipated costs.
- Approximately 7,552 families, or 27% of families, in Albemarle County earn below their household's survival budget.
- The percent of Black families not earning enough to meet their basic needs is 55%. The percent of Hispanic families not earning enough to meet their basic needs is 46%. These are 32% and 24% higher than the percent of white families earning below the survival budget (22%).
- The median family income for Albemarle County is $137,355. The tract with the lowest median family income is Oak Hill, Southwood at $50,000. The tract with the highest median family income is Ivy at $222,000.
- The tract with the highest percent of families with income below the average survival budget is Hydraulic with 73% of families. The tract with the lowest percent of families not earning enough to meet their basic needs is Polo Grounds Road with 3% of families. That is a difference of 70%.
- The annual survival budget for an average household 65 years and over in Albemarle County is $54,510. The tract with the highest percent of households 65 years and over with income below the average survival budget is Hydraulic with 71%. The tract with the lowest percent of households 65 years and over not earning enough to meet their basic needs is Darden-Key West and Western Ridge-Westhall with 13%.

Families

Table 4: Average Survival Budget for Families in Albemarle

	Monthly	Annual
Housing	$1,778.62	$21,343.44
Child Care	$1,019.08	$12,228.96
Food	$1,179.23	$14,150.76
Transportation	$637.69	$7,652.28
Health Care	$674.77	$8,097.24
Technology	$122.92	$1,475.04
Miscellaneous	$541.23	$6,494.76
Taxes	$851.46	$10,217.52
Total Income Needed to Meet Budget	**$6,805.00**	**$81,660.00**

Note: The Average Family Survival Budget is calculated using the ALICE 2024 Household Survival Budgets. The average budget is calculated for each locality based on families with one or two adults and one or two children. Family compositions include children ages 0-2 years (infant), 3-4 years (preschooler), and 5-17 years (school-aged). See the Appendix for detailed budgets for specific family compositions.

BUCKINGHAM COUNTY

There are 4,074 families living in Buckingham County. Of these families, 1,656 (41%) do not earn enough to provide for their family's basic needs.

Buckingham County at a glance:

- The annual survival budget for an average family in Buckingham County is $66,639.72. This is the income working families need to meet their basic necessities. The survival budget include: housing, child care, food, transportation, health care, and technology (phone and internet), plus taxes and a 10% contingency fund for one-time unanticipated costs.
- Approximately 1,656 families, or 41% of families, in Buckingham County earn below their household's survival budget.
- The percent of Black families not earning enough to meet their basic needs is 46%. This is 7% higher than the percent of white families earning below the survival budget (38%).
- The median family income for Buckingham County is $80,505. The tract with the lowest median family income is New Canton at $70,000. The tract with the highest median family income is Dillwyn and James River at $82,000.
- The tract with the highest percent of families with income below the average survival budget is New Canton with 45% of families. The tract with the lowest percent of families not earning enough to meet their basic needs is Mount Rush with 38% of families. That is a difference of 7%.
- The annual survival budget for an average household 65 years and over in Buckingham County is $42,558. The tract with the highest percent of households 65 years and over with income below the average survival budget is New Canton with 52%. The tract with the lowest percent of households 65 years and over not earning enough to meet their basic needs is James River with 37%.

Families

Table 6: Average Survival Budget for Families in Buckingham

	Monthly	Annual
Housing	$1,059.00	$12,708.00

Table 16: Average Survival Budget for Families in Nelson

	Monthly	Annual
Housing	$1,722.77	$20,673.24
Child Care	$1,019.08	$12,228.96
Food	$1,030.08	$12,360.96
Transportation	$637.69	$7,652.28
Health Care	$673.92	$8,087.04
Technology	$122.92	$1,475.04
Miscellaneous	$520.69	$6,248.28
Taxes	$793.31	$9,519.72
Total Income Needed to Meet Budget	**$6,520.46**	**$78,245.52**

Note: The Average Family Survival Budget is calculated using the ALICE 2024 Household Survival Budgets. The average budget is calculated for each locality based on families with one or two adults and one or two children. Family compositions include children ages 0-2 years (infant), 3-4 years (preschooler), and 5-17 years (school-aged). See the Appendix for detailed budgets for specific family compositions.

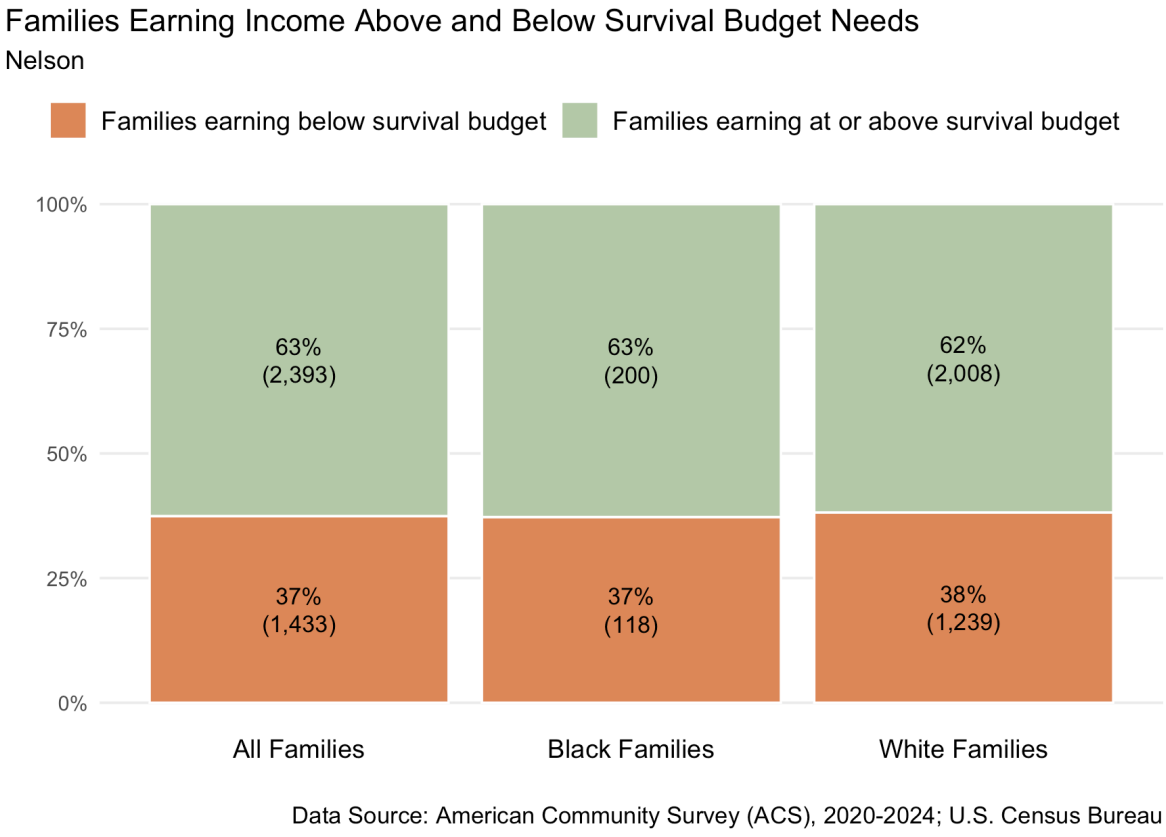

Figure 28: Percent and number of families earning above and below the average family survival budget, 2024 for Nelson County

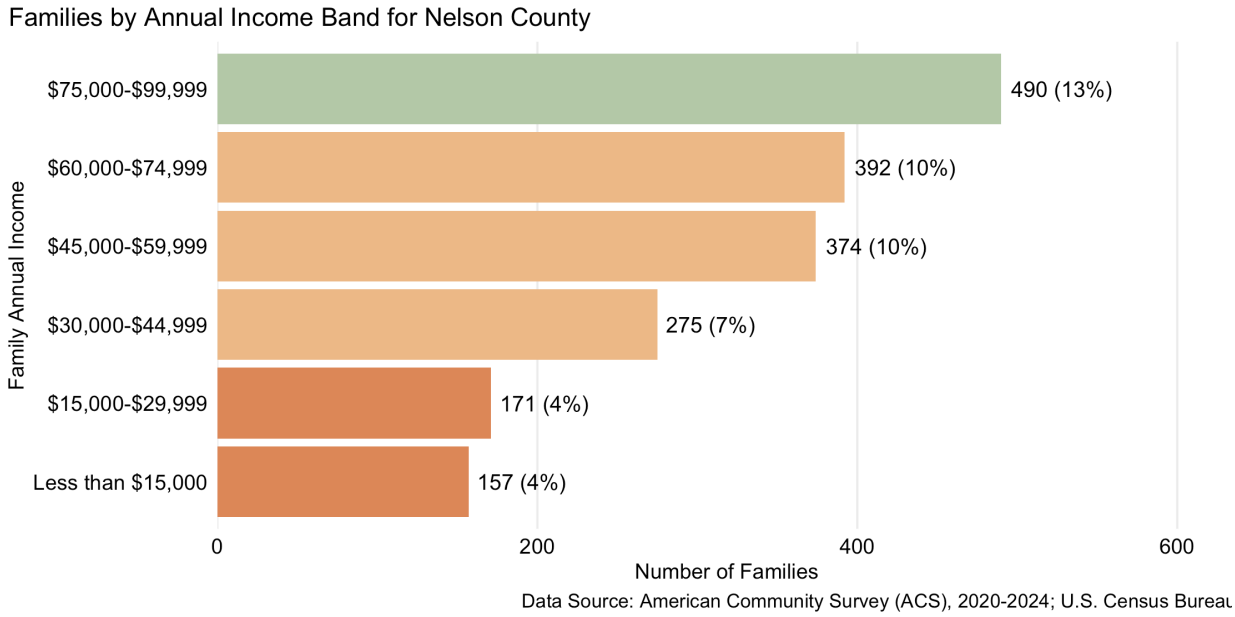

Figure 29: Number and percent of families by family annual income, for family incomes below $100,000, 2024, for Nelson County

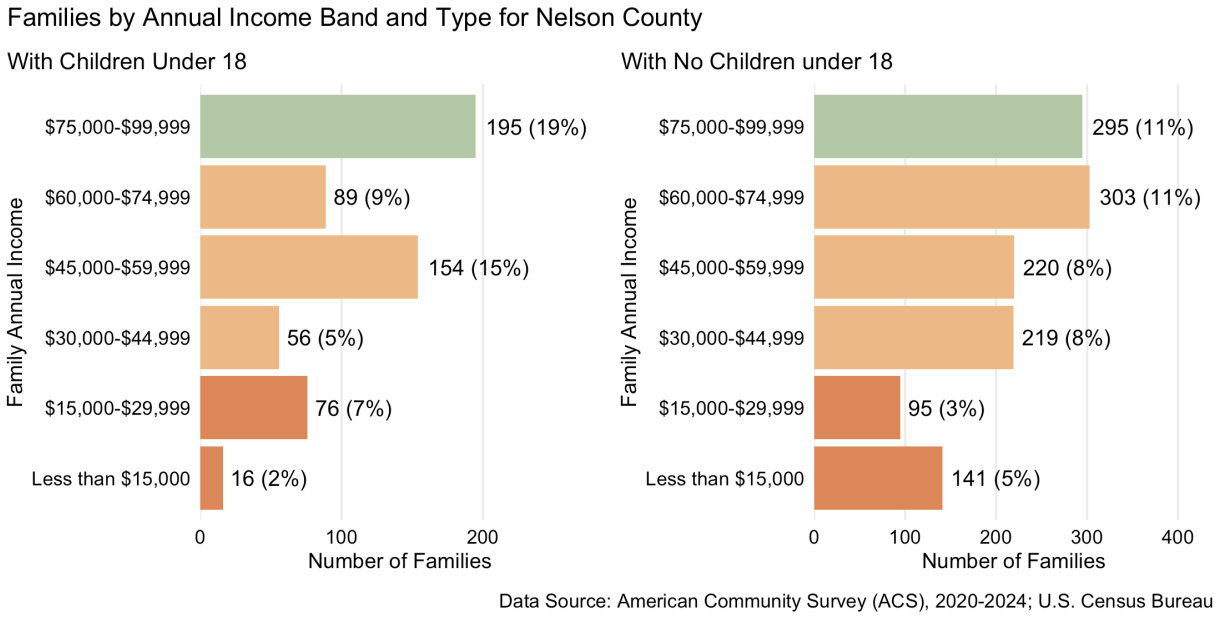

Figure 30: Number and percent of families with and without children under 18 years old by family annual income, for family incomes below $100,000, 2024, for Nelson County

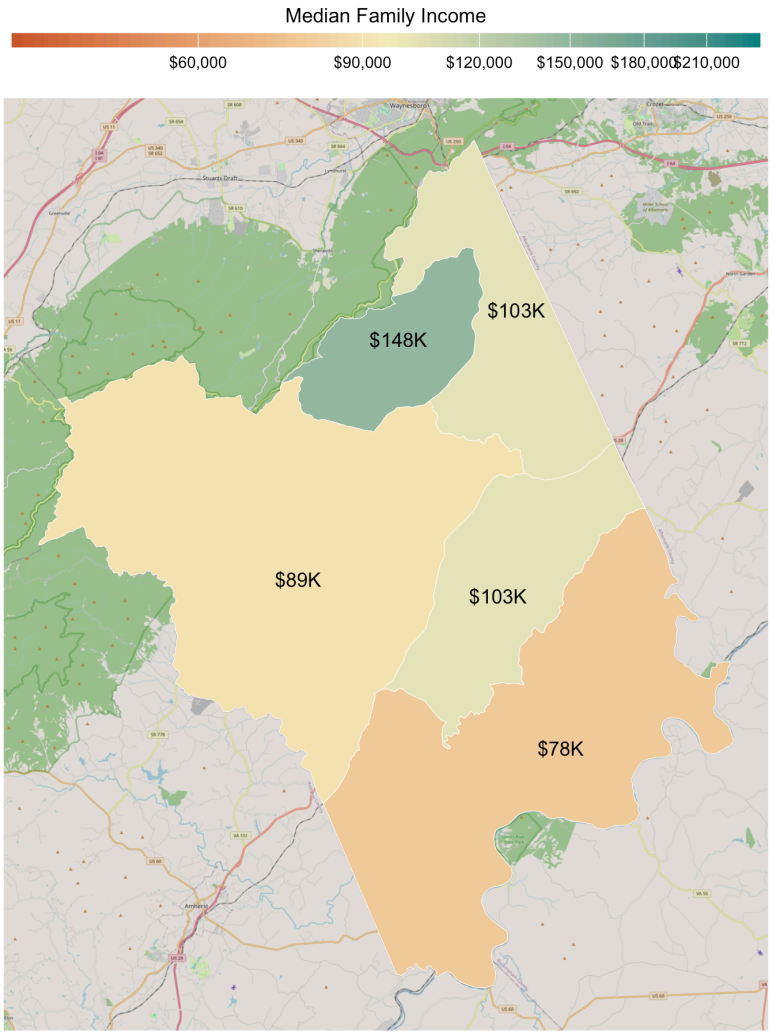
Median Family Income by Census Tract
Nelson



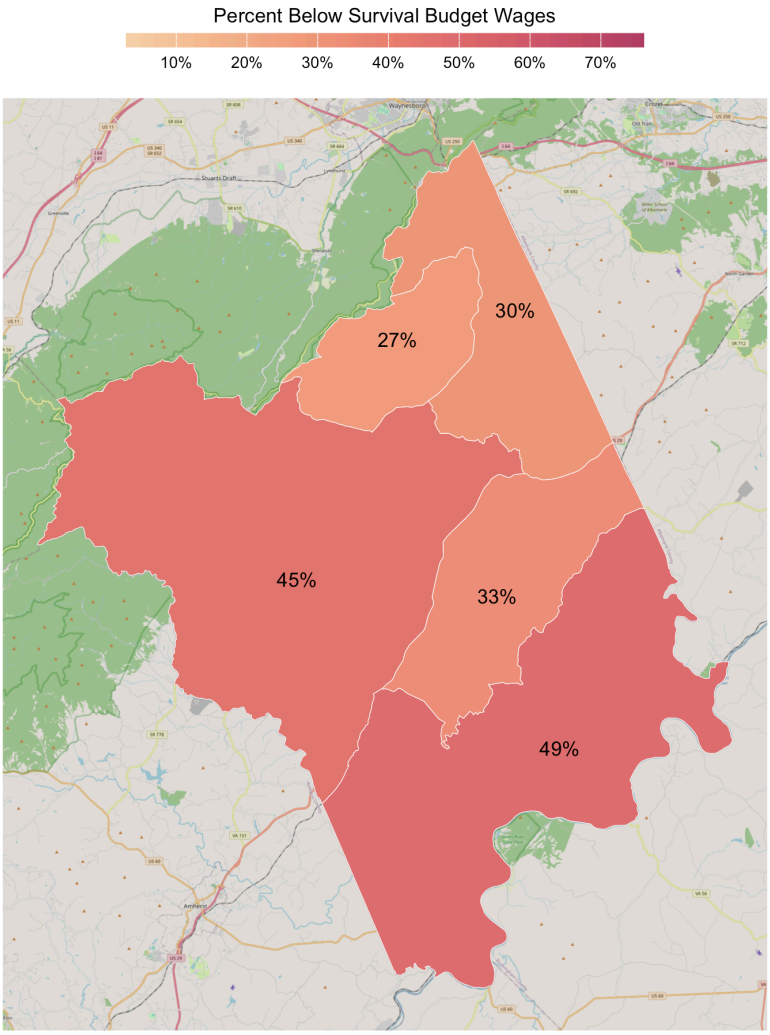
Data Source: American Community Survey (ACS), 2020-2024; U.S. Census Bureau

Census Tract	Median Family Income
Wintergreen-Wingina*	**$78,000**
Roseland	$89,000
Afton-Schuyler	$103,000
Lovingston	$103,000
Wintergreen-Rockfish Valley	$148,000

* Census tracts listed in bold have a median family income below the locality's average family survival budget.

Families with Income below Average Survival Budget

Nelson



Data Source: American Community Survey (ACS), 2020-2024; U.S. Census Bureau

Census Tract		Percent
Wintergreen-Wingina		49%
Roseland		45%
Lovingston		33%
Afton-Schuyler		30%
Wintergreen-Rockfish Valley		27%

Households 65 years and over

Table 17: Average Survival Budget for Households 65 years and over in Nelson

	Monthly	Annual
Housing	$1,544.00	$18,528.00
Child Care	$0.00	$0.00
Food	$600.50	$7,206.00
Transportation	$363.00	$4,356.00
Health Care	$718.50	$8,622.00
Technology	$119.00	$1,428.00
Miscellaneous	$334.50	$4,014.00
Taxes	$705.00	$8,460.00
Total Income Needed to Meet Budget	**$4,384.50**	**$52,614.00**

Note: The Average Household Survival Budget is calculated using the ALICE 2024 Household Survival Budgets. The average budget for households 65 years and over is calculated for each locality based on households with one or two adults aged 65 years and over. See the Appendix for detailed budgets for specific family compositions.

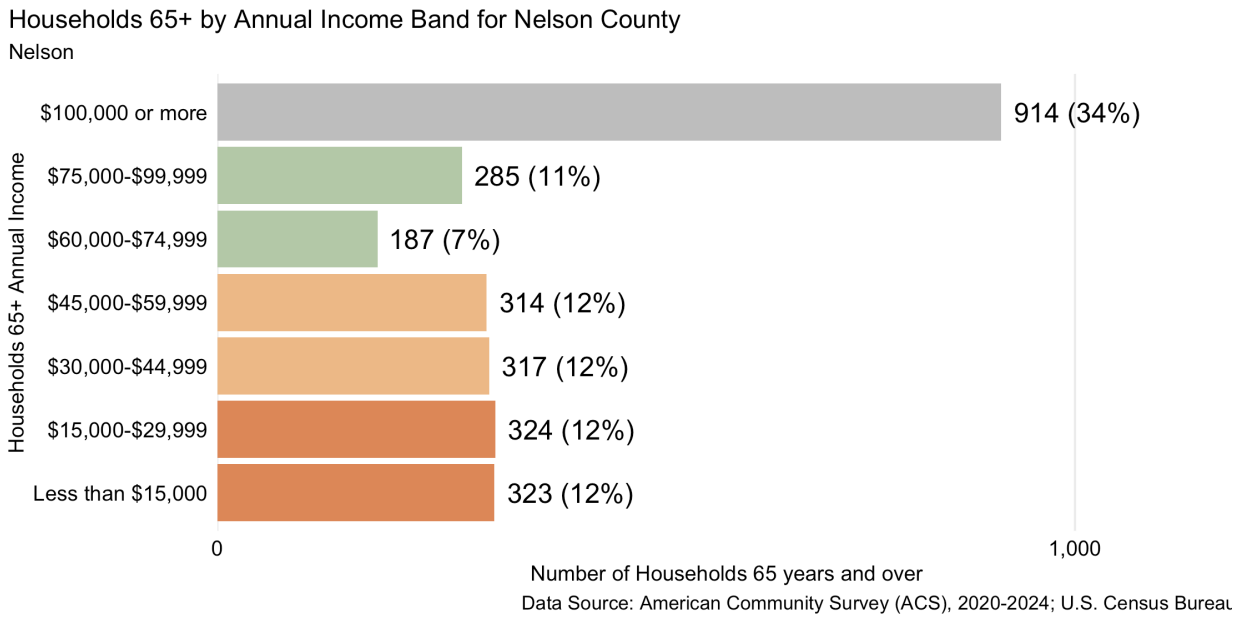


Figure 31: Number and percent of households 65 years and over by annual household income, 2024, for Nelson County

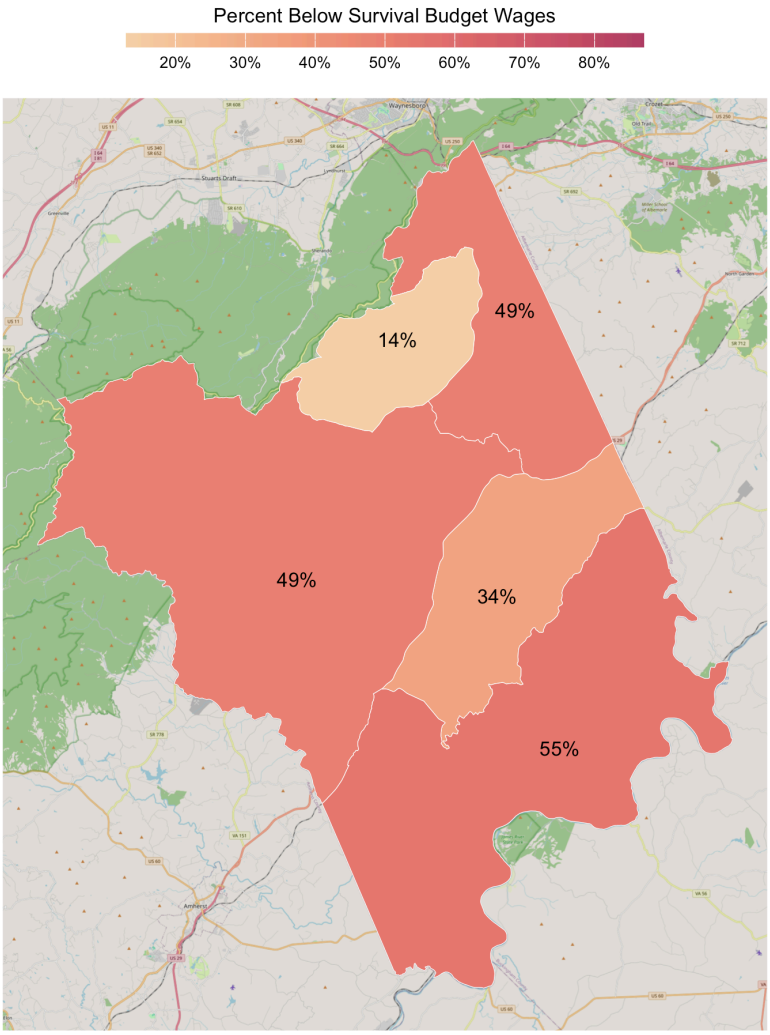
Households 65+ with Income below Average Survival Budget

Nelson



Data Source: American Community Survey (ACS), 2020-2024; U.S. Census Bureau

Census Tract	Percent
Wintergreen-Wingina	55%
Afton-Schuyler	49%
Roseland	49%
Lovingston	34%
Wintergreen-Rockfish Valley	14%

[1]A full list of occupations and wages is available here: https://github.com/virginiaequitycenter/orange-dot/blob/main/OrangeDot7_2026/data/bls_occupations_by_wagebin.csv

[2]The annual median wage is the boundary between the highest and lowest paid workers in a given occupation. Half of the workers in a given occupation earn more than the median wage, and half the workers earn less than the median wage.

[3]Employment rate is the number of jobs (employment) in the given occupation per 1,000 jobs in the Charlottesville Metro Area

[4]Major occupation groups defined by the Standard Occupational Classification (SOC) system, used by Federal statistical agencies to classify workers and jobs into occupational categories for the purpose of collecting, calculating, analyzing, or disseminating data.
